Boilerplate Cannot be Changed

Standard forms with recognizable boilerplate have been the preferred documents in commercial transactions since the invention of moveable type. For attorneys, they allow the ease and certainty of negotiating by exception. For clients, they support the efficient use of professional and staff time.

You are the only one who can change the fill-ins on Blumberg Forms Online. If you e-mail a form to another, the recipient cannot change the fill-ins.

Produce Forms Faster, Around the Clock

Every work station will have the entire inventory of Blumberg Forms available for instant use around the clock, plus links to 30,000 other law forms.

Creates Riders to Forms within .pdf file. If a field is too small to fit the variable information, the program allows you to create an Addendum.

File Management

An archive e-mail of each final is sent to the user. You may wish to save this e-mail on your computer. The file remains available at the site for 30 days after purchasing a form or for 10 days after the final print.

Start new forms with the same data. Change whichever fields are necessary for the new transaction. If you save e-mails to a forms folder it will be easier to use the filled-in fields as default data for the next transaction using the same form.

Unlimited Revisions of "DRAFTS"

The form may be revised as many times as you wish in the Draft mode. The fill-ins are locked only when you are ready for the final print. In either mode you can print as many forms as you like. For multipart forms (UCC-1, etc.) use the Print Dialogue Box to print all the pages, or just the ones you want.

Security

We delete site files 30 days after a draft is printed or 10 days after the final print. A password is required every time you go to the form to enter data or revise data.

High volume form users, consider BLUMBERG BLAZER 3.0 Software on CD-ROM. See other side. The same forms at substantial savings. Call 800 221-2972 x565 for information.
